WORK EXPERIENCE

Savannah River Nuclear Solutions **Aiken, SC**
Data Integration Intern *May 2026 – Aug 2026*

- Designed and built Python automation scripts (Pandas, JSON) to process and transform data across 3+ enterprise systems, cutting manual processing time by 40% (~6 hours/week) and improving data quality
- Engineered and implemented a data integration solution joining 4 separate workflows into unified reporting pipelines, saving stakeholders 10+ hours per reporting cycle
- Led deployment of the solution and partnered with key stakeholders to drive company-wide adoption across 3 departments

Clean Community Inc. **Remote**
Software Engineering Intern *May 2025 – Aug 2025*

- Developed Unity applications with server-side C# logic, building real-time multiplayer functionality with the Mirror networking library that reduced network latency by 25%
- Implemented client-server communication protocols and conducted local testing with simulated clients, improving responsiveness and reducing synchronization issues by 20%
- Led weekly sprint planning, issue tracking, and debugging sessions, driving resolution of 50+ bugs and gameplay inconsistencies

PROJECTS

Quest — 1st Place Winner, Spring 2026 Hacklanta Hackathon (React, Node.js, Gemini API, Google Maps API, Vercel)

- Led backend development and deployment of a full-stack, AI-powered web app on a 4-person team, generating personalized real-world adventures from user mood, time, and location
- Engineered a Gemini-orchestrated backend aggregating real-time data from 3+ external APIs per request, cutting response time by 35% through parallel API calls and improving route efficiency by 20%
- Led deployment under a 12-hour time constraint using React (Vite) and Node.js serverless functions on Vercel, shipping a working end-to-end prototype

Roman's Summer Bridge Website (React, Flask, PostgreSQL, Neon, Render)

- Led end-to-end development and deployment of a full-stack web app enabling 50+ students to log 500+ service hours, reducing manual hour tracking by 80%
- Leveraged Flask, bcrypt-secured authentication, and role-based access control to lead backend development, with a scalable database layer supporting SQLite and PostgreSQL

LEADERSHIP & PROFESSIONAL DEVELOPMENT

Roman's Summer Bridge Program **Tucker, GA**
Founder *June 2025 – Present*

- Founded and scaled a summer enrichment program serving 30+ students, recruiting and leading 10+ volunteers across multiple grade levels
- Initiated and designed 20+ hours of math, reading, and writing curriculum aligned to Georgia Standards of Excellence, improving student assessment scores by 15%

Management Leadership for Tomorrow **Atlanta, GA**
Career Preparation Fellow *Nov 2025 – Present*

- Selected for a competitive 20-month career development program in which 95% of Fellows secure summer internships, completing business case studies and coaching to grow leadership and technical skills

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, C#, JavaScript, SQL, HTML/CSS
Systems & Concepts: Data Structures & Algorithms, Client-Server Architecture, Distributed Systems (Multiplayer Networking), REST APIs
Frameworks & Libraries: React, Node.js, Flask, Pandas
Tools & Platforms: Git, VS Code, AWS, Neon, Render, Unity, Claude, Cursor

EDUCATION

Georgia Institute of Technology **Atlanta, GA**
Bachelor of Science in Computer Science *Expected May 2028*
Awards/Honors: Lillian P. and Victor Rattner Computer Science Scholarship; 1st Place, Hacklanta Hackathon (Spring 2026)
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming
